Skills and the construction process: a comparative study of vocational training and quality in social housebuilding
Clarke, L and Wall, C (1998) “A blueprint for change: construction skills training in Britain”. University of Bristol: Policy Press. Clarke, L and Winch, C (2004) Apprenticeship and Applied Theoretical Knowledge. “Educational Philosophy and Theory”, 36(5), 509-21. Construction Skills (2008) “Construction Skills Network: Blueprint for UK construction skills 2008 to 2012.” Bircham Newton: Construction Skills. Dainty, A R J, Ison, S G and Root, D S (2004) Bridging the skills gap: a regionally driven strategy for resolving the construction labour market crisis. The training schemes run by the Council became compulsory for new entrants to journalism from 1961, when about 500 trainees were registering each year. To regulate the training courses around the country, the Council has 15 Regional Committees based in various towns. These committees supervise the operation of the training schemes in their areas, keep in touch with the local education authorities in arranging courses, and advise local editors on methods of vocational training, and provide the experienced journalists to conduct proficiency tests. Research by the British Market Research Bureau (BMRB) last year found that people are generally pleased that the Games are coming and confident they will have a positive impact on London and the UK: 176% say they are extremely, very or quite pleased about the Games. 176% are confident the Games will be a success.
